EDITORS

Control and Estimation Theory

(in particular optimal, stochastic and nonlinear control, games, state estimation, and discrete event systems)

Professor Tamer Başar

Deputy Editor-in-Chief
University of Illinois at Urbana-Champaign, Coordinated Science
Laboratory, 1308 West Main Street
Urbana, IL 61801, U.S.A.
Tel. +1 217 333 3607
Fax +1 217 244 1653
E-mail tbasar@decision.csl.uiuc.edu

Applications and Computer Control

(development, implementation and operational evaluation in all fields of automatic control, including software and computer-aided control system design)

Professor Yaman Arkun

Georgia Institute of Technology, School of Chemical Engineering
778 Atlantic Drive, Atlanta, GA 30332-0100, U.S.A.
Tel. +1 404 894 2871
Fax +1 404 894 2866
E-mail yaman_arkun@chemeng.gatech.edu

System Theory

(including robust, distributed and geometric control systems)

Professor Ruth F. Curtain

Mathematisch Instituut, Rijksuniversiteit Groningen
Postbus 800, 9700 AV Groningen, The Netherlands
Tel. +31 50 633985/633987
Fax +31 50 633976
E-mail r.f.curtain@math.rug.nl

Adaptive Control

(including applications, robotics, and new topics such as use of neural networks in this field)

Professor C. C. Hang

Deputy Vice-Chancellor's Office, National University of Singapore
10 Kent Ridge Crescent, Singapore 0511
Tel. +65 772 2434/776 2835
Fax +65 778 1851
E-mail dvchcc@leonis.nus.sg

Large Scale Systems, Management and Decision Sciences

(including expert systems, artificial decision support systems, hierarchical systems, man-machine systems, and environments for systems engineering)

Professor Andrew P. Sage

Dean, School of Information Technology and Engineering
George Mason University, Mail Stop 4A3, 4400 University Drive
Fairfax, VA 22030-4444, U.S.A.
Tel. +1 703 993 1500
Fax +1 703 993 1734
E-mail asage@gmu.edu

System Parameter Estimation

(including applications in this field, and new topics such as system fault detection)

Professor Torsten Söderström

Systems and Control Group, Uppsala University
P.O. Box 27, S-751 03 Uppsala, Sweden
Tel. +46 18 183075
Fax +46 18 503611
E-mail ts@syscon.uu.se

SPECIAL CATEGORY EDITORS

Survey Papers

(including all fields in automatic control)

Professor Karl J. Åström

Dept. of Automatic Control, Lund Institute of Technology
P.O. Box 118, S-221 00 Lund, Sweden
Tel. +46 46 22 28781
Fax +46 46 138118
E-mail karl-johan.astrom@control.lth.se

Rapid Publications

Technical Communiques and Correspondence
(in all fields of control)

Professor Peter Dorato

Dept. of Electrical and Computer Engineering, University of New Mexico, Albuquerque, NM 87131, U.S.A.
Tel. +1 505 277 0299
Fax +1 505 277 1439
E-mail peter@eece.unm.edu

Book Reviews

(in all areas of interest related to automatic control)

Professor David J. Limebeer

Dept. of Electrical Engineering, Imperial College
Exhibition Road, London SW7 2BT, U.K.
Tel. +44 171 59 46634
Fax +44 171 59 46606
E-mail djl@ps.ic.ac.uk

IFAC/Elsevier Science agreement

By an agreement between IFAC and Elsevier Science Ltd (the official IFAC publisher), AUTOMATICA is an official Journal of IFAC, the International Federation of Automatic Control.

Submission of scripts

Authors should send five copies of manuscripts for publication to the appropriate Editor.

Aims and Scope

Automatica publishes papers on original theoretical and experimental research and development in the control of systems, involving all facets of automatic control theory and its applications. Preferably, theoretical papers should include applications; papers dealing with components and systems should include theoretical background and, where appropriate, economic implications.

It is intended to publish only those papers, including those based on IFAC meeting presentations, which may be regarded as new, worthwhile contributions in this field. Papers should be intelligible to the general body of control engineers, which requires that specialized techniques, terminology and acronyms be well defined and/or referenced.

Automatica has a tradition of publishing definitive papers covering a topic in depth, papers which are referred to for many years. For such papers the length requirements may be relaxed at the discretion of the Editor-in-Chief.

The scope of the journal is extensive. Topics include: the theory and design of control systems and components, encompassing robust and distributed control using geometric, optimal, stochastic and nonlinear methods, game theory and state estimation; adaptive control, including robotics, neural networks, parameter estimation and system fault detection; additional topics including artificial intelligence, fuzzy and expert systems, hierarchical and man-machine systems, all parts of systems engineering which consider the reliability of components and systems; data processing; and computers for computer-aided design, manufacturing, and control of various industrial processes, space vehicles and aircraft, ships, traffic, biomedical systems, national economies, power systems, agriculture and natural resources.

Submitted articles may be of four basic types:

- 1 **Papers**—Detailed discussions involving new research, applications or expositions.
- 2 **Brief Papers**—Brief presentations of new technical concepts and developments.
- 3 **Technical Communiques**—Useful ideas, pertinent comments or conjectures of a technical nature on established control topics.
- 4 **Correspondence**—Letters to the Editor about the Journal or to authors commenting on previously published papers. In the latter case, the Editor will give the authors an opportunity to respond.

The journal also includes the following features: Special Issues on subjects of increasing importance, Survey Papers, Tutorial Papers, Book Reviews, Software Reviews, Technical Communiques and Correspondence.

Publishing, Subscription and Advertising Offices

Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A. and for the remainder of the world to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K.

Subscription Rates (including postage and insurance)

Annual Institutional Subscription Rates 1996: North, Central and South America, U.S.\$1284, Rest of World £807. Personal Subscription Rate for IFAC Affiliates 1996: U.S.\$166, £104. Personal Subscription Rates are also available on request for those whose institutions are library subscribers. Combined Subscription of *Automatica* and *Control Engineering Practice* 1996: U.S.\$1769, £1112. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. Published monthly. For information about becoming an IFAC Affiliate, contact the IFAC Secretariat.

SECOND CLASS POSTAGE PAID AT NEWARK, NEW JERSEY AND ADDITIONAL ENTRY POINTS. *Automatica* (ISSN 0005-1098) is published monthly, January to December in one volume, by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. The annual subscription in the U.S.A. is \$1284. *Automatica* is distributed by Virgin Mailing and Distribution, 10 Camptown Road, Irvington, NJ 07111-1105, U.S.A. POSTMASTER: Please send address corrections to *Automatica*, c/o Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

This journal and the individual contributions contained in it are protected by the copyright of Elsevier Science Ltd, and the following terms and conditions apply to their use:

Photocopying: Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

In the U.S.A., users may clear permissions and make payment through the Copyright Clearance Center Inc., 222 Rosewood Drive, Danvers, MA 01923. In the U.K., users may clear permissions and make payment through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 9HE. In other countries where a local copyright clearance centre exists, please contact it for information on required permissions and payments.

Derivative Works: Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage: Permission of the publisher is required to store electronically any material contained in this journal, including any article or part of an article. Contact the publisher at the address indicated.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Notice: No responsibility is assumed by the publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Microform Subscriptions and Back Issues

Back Issues: Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1990–1995. Earlier issues are available in high quality photo-duplicated copies as complete volumes only. Back volumes on microfilm are available from UMI, 300 North Zeeb Road, Ann Arbor, MI 48106, U.S.A.

©TM The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

ContentsDirect delivers the table of contents of this journal, by e-mail, approximately two–four weeks prior to each issue's publication. To receive this free service complete and return the form at the back of this issue or send an e-mail message to e.nash@elsevier.co.uk.

 28 (1992) 823-826
Gap metric
 31 (1995) 931-940
Gas turbine control
 10 (1974) 469-481
Gas turbines
 15 (1979) 553-577
 25 (1989) 413-420
 30 (1994) 1357-1373
Gauge control
 6 (1970) 591-599
Gauge functions
 28 (1992) 945-959
Gauss-Markov systems
 10 (1974) 277-283
Gaussian approximation
 24 (1988) 243-247
Gaussian noise
 1 (1963) 263-288
Gaussian process
 31 (1995) 1459-1464
Gaussian sum approach
 11 (1975) 285-296
Gaussian sum methods
 7 (1971) 465-479
Generalized least squares
 10 (1974) 681-683
 27 (1991) 183-188
Generalized minimum variance control
 23 (1987) 797-799
Generalized predictive control
 30 (1994) 605-613
 30 (1994) 1990-1997
Generalized sampled-data hold function
 30 (1994) 461-470
Generalized stable derivative
 31 (1995) 531-542
Generalized state-space models
 31 (1995) 907-912
Generalized state-space systems
 28 (1992) 119-137
 30 (1994) 1921-1936
Generalized SVD
 30 (1994) 39-43
Generalized systems
 28 (1992) 1223-1228
Generators
 30 (1994) 1625-1630
Geometric approach
 15 (1979) 387-402
 31 (1995) 897-901
Geometric control theory
 12 (1976) 167-176
 12 (1976) 635
Geometric methods
 24 (1988) 31-41
Geometric state-space theory
 15 (1979) 5-13
 15 (1979) 641-651
Geometric theory
 26 (1990) 411-415

 20 (1984) 69-77
Linear quadratic control
 23 (1987) 117-121
 27 (1991) 1063-1064
Linear quadratic Gaussian control
 31 (1995) 1577-1594
Linear quadratic Gaussian theory
 27 (1991) 257-280
 28 (1992) 493-507
 29 (1993) 1377-1394
Linear quadratic regulator
 22 (1986) 593-597
 28 (1992) 35-44
Linear regression
 30 (1994) 433-446
 31 (1995) 1821-1834
Linear regulator methods
 12 (1976) 565-576
Linear regulator problem
 5 (1969) 855-857
Linear regulators
 9 (1973) 107-115
 26 (1990) 619-621
Linear SISO systems
 31 (1995) 1605-1617
Linear state feedback
 30 (1994) 499-502
Linear state space systems
 29 (1993) 237-240
Linear switching
 2 (1965) 255-274
Linear systems
 1 (1963) 177-205
 1 (1963) 263-288
 2 (1965) 211-234

 31 (1995) 1853-1864
- Stone-Weierstrass theorem**
 12 (1976) 619-622
- Stress control**
 16 (1980) 45-52
- Strict adjoints**

- 28 (1992) 411-415
Strict contraction
 25 (1989) 777-780
Strictly positive realness
 30 (1994) 643-654
Strictly bounded real lemma
 25 (1989) 777-780
Strictly doubly coprime factorizations
 30 (1994) 1955-1959
Strictly proper compensator
 30 (1994) 461-470
Strip rolling control
 5 (1969) 433-447
Strong stabilizability
 28 (1992) 1051-1055
Strong stabilization
 25 (1989) 427-430
 30 (1994) 1797-1800
 31 (1995) 531-542
Strongly connected system
 17 (1981) 665
Structural controllability
 13 (1977) 109-123
 20 (1984) 247-250
 27 (1991) 877-881
 29 (1993) 527-530
 31 (1995) 1011-1017
Structural invariants
 22 (1986) 449-456
 30 (1994) 1921-1936
Structural isomorphic models
 16 (1980) 237-253
Structural modeling
 17 (1981) 647-652
Structural properties
 15 (1979) 609-614
Structural stability
 31 (1995) 669-680
Structurally fixed modes
 31 (1995) 1011-1017
Structure at infinity
 29 (1993) 635-647
Structure determination
 27 (1991) 339-348
Structure estimation
 17 (1981) 541-544
Structure identification
 26 (1990) 651-677
Structure selection
 24 (1988) 365-373
Structure symmetry
 1 (1963) 21-29
Structured LTI uncertainty
 31 (1995) 99-113
Structured matrices
 31 (1995) 1263-1274
Structured perturbations
 25 (1989) 267-272
 30 (1994) 1741-1750
Structured real uncertainty
 29 (1993) 13-35
Structured singular value
